Environment brings you today's most critical environmental issues put in perspective by the world's foremost scientists and policymakers. The result is a lively, well-respected magazine with readable, thought-provoking articles for the nonspecialist as well as the environmental professional.

For more than 36 years, **Environment** has been *the* source for balanced, authoritative discussions of the environmental issues shaping the world. Regular features include news briefs of current issues, critical reviews of major government and institutional reports, listings of notable books, and commentaries that provide differing points of view on the articles.
